Retail Revolution: How Times Have Changed?

While the internet has made shopping more convenient for us, many people still don't prefer buying merchandise without touching, smelling, or experiencing it firsthand.

In fact, according to a recent survey that includes over 1,000 U.S. consumers, it is found that most millennials like to visit brick-and-mortar retail stores far more than their online counterparts. To be more specific, half of the millennials (about 56%) surveyed accepted to have regularly shopped in physical stores at least once a week. Their reason seemed to vary for this — from the benefit of avoiding delivery fees to the convenience of immediate possession of the item to the interactive experience of trying or seeing a product in person.

That's why it is crucial for store owners to ramp up their commercial space, as it can highly influence their brand perception and help them gain more customers in the long run.

Lighting: Why is it a Key Element in Store Construction & Planning?

While lighting during a store's construction & planning process is often given the least amount of importance, it, in fact, contributes majorly in setting the mood and influencing people's buying decisions. Studies over the years have proved that quality lighting in stores also boosts the overall sales of a business.

To better understand this, let's have a look at what Gerry Weber did!

Gerry Weber, a German fashion retailer, installed high-end retail lights in his store to highlight his key merchandise. He realized that the targeted customers felt comparatively more comfortable and spent more time exploring the merchandise. This boosted the sales of his business by an average of 10%.

Some Other Ways in Which Lighting Can Impact Your Business

Target Group Appropriate Lighting

The change in intensity, color, color temperature, contrast, and uniformity of store lights has the ability to grab the attention of your target audience and influence their buying decision.

Revealing Authenticity

Quality lighting in a store with an excellent color rendering index and special light spectrums has the ability to reveal the true color and quality of the merchandise.

Adding an Element of Design to the Ceilings

Smart lighting solutions with elegant designs also contribute to enhancing the overall aesthetics of the stores. The extremely large ceiling areas in the retail outlets can be made more presentable with well-designed and exquisite store lights.

Soft Illumination

The modern LED store lights are virtually free from all sorts of harmful emissions, such as infrared radiation or UV radiation that can deteriorate the quality of your merchandise.

IKIO, Making Your Vision of Store Lighting Come True!

IKIO's ability to tune into customers' unique needs and deliver industry-forward solutions is what makes us stand out from other brands. We value every client's vision and therefore, offer custom-made solutions that perfectly align with it.

Disrupting Limitations in Store Lighting Through **Customized LED Solutions**

Bound By Limitations

V/S

IKIO

No Limitations: **We Customize Everything!**

IKIO offers the best in everything based on your requirements.

*Note: All of these can be customized as per your needs.

How Do We Make Store Lighting Super Accessible?

— We source all our components — LEDs, drivers, optics — only from the best vendors.

— We have high-end technology such as Goniometer, helping us deliver solutions without delays.

— We offer thorough assistance with the lighting layout so you can make the best of our solutions.

— We continuously innovate to develop solutions — such as our MARVELA SERIES — that bring down the hassle of complete fixture overhauls in stores.

— We are US-based, executing nationwide deliveries in a quick and efficient manner.

Track Lights

Track Lights, also called Accent Lights, add drama to a space by creating visual interest. Whether it is a small convenience store or a large department store, IKIO's track lights can be arranged in any space irrespective of the size. They can either be used as spot lights to highlight only a certain section of your store or they can be used to evenly illuminate the whole store.

Can be surface-mounted, recessed, or suspended.

Are highly customizable, low maintenance, and flexible.

Allow you to create the desired visual effect.

Alem

Track Light

Alem is a technologically advanced LED track light with incorporated electronic gear and chip on board. It also has a high-quality reflector with four different beam spreads. Moreover, the lamp housing of die-cast aluminum for optimal cooling allows the fixture to last longer than its traditional counterparts.

Rimin

Projector Light

Rimin Projector Light is a versatile lighting solution designed for adaptability, aesthetics, and dynamic projection capabilities. Its advanced features include an electronic gear, a chip on board, and a high-quality reflector that supports three different beam angles. It is 15° to 60° adjustable, which empowers you with tailored precise illumination. In addition, the projection options in various shapes, such as round, square, and more, allow you to effortlessly create captivating visual displays. Moreover, the lamp housing of die-cast aluminum for optimal cooling allows the fixture to last longer than its traditional counterparts. Experience the seamless fusion of functionality and aesthetics with Rimin Projector Light!

Downlights

Downlights, also called Ambient Lights, help in the overall illumination of a space. Their main function is to illuminate the space to a comfortable level of brightness. These lights cater to almost all kinds of retail spaces and sometimes even commercial spaces.

They are installed into a hollow opening in the ceiling.

The color temperature of a downlight helps set the ambience.

They barely take any vertical space in the place of installation.

Lumos

Downlight

Circular in design, this LED downlight is made of aluminum die cast with high quality powder coated luminaire housing and optimum heat sink. Available in multiple wattages and beam angles, the luminaire renders greater flexibility in its application for store lighting. Moreover, the specular darklight reflector in this store light allows outstanding visual comfort to the visitors.

2. Black/White inner ring -IP44 type available, at added extra cost. 3. 30 W has Energy star type option, at added extra cost.

Scint

Downlight

Square in design, Scint LED downlight is made of aluminum die cast with high-quality powder coated luminaire housing and optimum heat sink. Available in multiple wattages and beam angles, the luminaire renders greater flexibility in its application for store lighting. Moreover, the specular darklight reflector in this store light allows outstanding visual comfort to the visitors.

Technical Parameters

Voltage	100 - 277 V AC, 50-60 Hz
Light Source	Osram SOLERIQ S 19
Operating Position	Swiveling Type, 360D
Start Time	Instant
Driver	Stand Alone (Included)
Optics	Darklight Technology Black, Silver
Dimming	On-Off / Triac / 0-10 V

Odin

Downlight

Create the desired lighting effect in your stores with IKIO's Odin, a twin square LED downlight made of aluminum die cast with high-quality powder coated luminaire housing and optimum heat sink. These properties of the luminaire contribute to its effective functioning for a longer time period. Moreover, available in multiple wattages, color temperatures, finishes, and beam angles, this luminaire offers greater flexibility in its application.

Technical Parameters

Voltage	100 - 277 V AC, 50-60 Hz

Flare

Downlight

Flare downlight is a square-shaped fixture that illuminates a store in the most effective manner without being obtrusive. The smart engineering of the luminaire with specular reflector & power grid/ global connectors, along with a high voltage standing in-house LED driver, makes it an ideal choice for lighting your stores.

Pendant Lights

Pendant lights are commonly used in stores as ambient or task lights. They are a perfect replacement for traditional store lights and deliver both both style and function. Pendant lights can be used in places such as the bill counter, aisle areas, or changing rooms within a store.

Come in varied shapes and sizes to complement different spaces.

Their unique designs uplift the aesthetic appeal of your stores.

Are highly customizable, low maintenance, and flexible.

Remus

Pendant Light

Remus is a technologically advanced LED pendant light that incorporates electronic gear and a high-quality lens with three different beam spreads. While commonly used as a task light, the unique and state-of-the-art design of this luminaire also enhances the overall aesthetics of your store.

Know More About IKIO

IKIO is one of the fastest-growing LED brands in America with a successful track record of being a reliable and trusted lighting partner. IKIO combines innovative ideas, expertise & advanced technology to create cutting-edge lighting solutions that are changing the landscape of the lighting industry. We are ideally positioned to offer the right solutions for all your lighting requirements because of our holistic approach and vertically integrated infrastructure.

1

America's **top 500 fastest-growing companies** as per Inc 5000.

2

Headquartered in Indianapolis, Indiana: a strategic location that enables us to serve customers nationwide.

3

An expansive DLC-qualified **products**.

4

Serving **Commercial, Industrial, Hazardous Locations, as well as Horticulture Applications**.

5

6 World-class vertically-integrated manufacturing facilities in different countries.

6

Existing clients — **H&M, Adidas, Hilton, Reebok, etc.**
